

Standards for Mathematical Practice	Sample Student Evidence <i>(list the card number only)</i>	Sample Teacher Evidence <i>(list the card number only)</i>
1. Make sense of problems and persevere in solving them.	2	15
2. Reason abstractly and quantitatively.	3	9
3. Construct viable arguments and critique the reasoning of others.	10	12
4. Model with mathematics.	7	11
5. Use appropriate tools strategically.	14	4
6. Attend to precision.	6	8
7. Look for and make use of structure.	16	1
8. Look for and express regularity in repeated reasoning.	5	13
